PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals
CAUTION
Keep away from children, pets, and domestic animals. Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wear long-sleeved shirts and long pants, socks and shoes, and gloves. Wash thoroughly with soap and water after handling. Wash hands before eating, handling food, chewing gum, smoking, or using the toilet. Any person who receives care from a person thought to have handled this product should wash hands thoroughly with soap and water.

Environmental Hazards
This product is toxic to fish, birds, and other wildlife. Exposure to soil surfaces may be hazardous to birds and other wildlife. Dogs and other predatory and scavenging animals might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, to areas frequented by fish, or to impounded water bodies. Remove personal protective equipment (PPE) immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing. Keep and wash PPE separate from other laundry. Follow manufacturer’s instructions for cleaning/sterilizing PPE. If no such instructions for washables, use detergent and hot water.

RESTRICTED USE PESTICIDE
Due to Hazards to Nontarget Organisms
For retail sale and use only by Certified Applicators and/or persons under their direct supervision and only for those areas covered by the Certified Applicator’s certification.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

THIS PRODUCT MAY ONLY BE DISTRIBUTED AND USED IN CALIFORNIA AND MAY ONLY BE SOLD, ISSUED, AND DISTRIBUTED BY COUNTY AGRICULTURAL COMMISSIONERS.

READ THIS LABEL. Read the entire label and follow all directions and precautions.

IMPORTANT: Store product not in use in a location out of reach of children, pets, domestic animals, and wildlife. Dispose of product container, unused, spoiled, or unneeded as specified in the “STORAGE AND DISPOSAL” section of this label.

USE RESTRICTIONS—FOR ALL USES
This product may only be used to control CALIFORNIA GROUND SQUIRRELS (Spermophilus beecheyi) and DEER MICE (Peromyscus maniculatus) in the use sites and using the application methods indicated in the “USE RESTRICTIONS”—Pricane Agricultural Commissions indicated below for the target species populations. Contact your local County Agricultural Commissioner’s office if you need help in identifying the target species you intend to control.

Use only in rodent infested areas where exposure to agricultural crops or commodities will not occur. Do not distribute food or feed stuff.

Do not apply this bait in or around homes or other human residences. Do not apply this bait at sites or in control zones not indicated on this label. Do not apply this product by application methods not specified in this label. Do not spill bait.

Do not apply this product in occupied habitat of endangered species that may be harmed by exposure to this bait or to animals that have consumed it. Contact your local County Agricultural Commissioner’s office or http://www.cdfw.ca.gov/wwf/baits/ppt or refer to the information for endangered species that use this product in your area and may be threatened.

Do not apply this product in a way that will contact workers or other persons, other directly or through drift. Only permitted handlers may be in the area during application. Keep all other persons out of the treatment area during application.

Do not apply bait in or near actively growing food or feed crops or in areas where contacting food or surfaces that may contact food is likely. Do not apply bait at sites where bait may contaminate bodies of water. When applying bait, avoid contact with other waterways, including rainwater that may be directed into streams or waterbodies.

FOLLOW-UP OPERATIONS—FOR ALL USES
Collect dead rodents and dispose of them by deep burial, burning (if permitted in your County or community), or by double-plastic bagging or wrapping in newspaper and discarding at trash. Wear disposable plastic gloves or other suitable hand protection if you must pick up carcasses by hand.

VINEYARDS, ARIDIS, GROVES, FORESTY, PASTURES, PASTURES, RANGELANDS AND SELECTED NONCROP AREAS

ENDANGERED SPECIES CONSIDERATIONS
Notice: Killing of an endangered species may result in fine and/or imprisonment under the Endangered Species Act. The use of this product may pose a hazard to a Federally designated endangered/threatened species. For protection of federally listed species, users shall consult the U.S. EPA Endangered Species Bulletin for the county in which the application is to be made. A copy of the bulletin may be obtained from the county agricultural commissioner or downloaded from the internet at the following website: http://www.epa.gov/owsl/prs/endangered.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage and disposal.
Nonrefillable container. Do not re-use or re-fill this container. Offer for recycling if available.

Pesticide Storage: Store in a dry place. Do not store near the home. Store in a locked enclosure or other location not accessible to children, pets, domestic animals or wildlife.

Pesticide Disposal: Washwater resulting from the use of this product may be disposed of in any suitable, approved wastewater disposal system or by contact with agricultural commodities. Improper disposal of this product may result in the contamination of crops, soil, or water. Do not dispose of pesticide, syrup or menus in a rotation of Federal Law. If these wastes cannot be disposed of by the use according to label instructions, contact your State Pesticide Program, your local land grant University, your State Agricultural Extension Service, your State Department of Agriculture, the Federal Insecticide, Fungicide and Rodenticide Act, the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Handling: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill, or by incineration, or if allowed by State or Local authorities, by burning. Be certain to completely empty out of the body.

Caution: Don’t allow pregnant or lactating animals to eat this bait.

RODENT BAIT DIPHACINONE TREATED GRAIN (0.01%)
Active Ingrdients:
Diphacinone dipropanoate 1-5,1-methanolide .................................................. 0.01% Other Ingrdients .......................................................... 99.99%
Total .......................................................... 100.00%

KEEP OUT OF REACH OF CHILDREN

FIRST AID
Antisuicidal (Biocidal/communitarian class)
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
If Inhaled:
• Call a poison control center or doctor immediately for treatment advice.
• Give person who swallowed soap, water, or statement to be followed immediately: this product is inedible. Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.
If Injured:
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.
If by Eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

For more information on this pesticide product (including health and medical emergency information), call the National Poison Information System at 1-800-222-1222.

NOTE TO DISHWASHERS
This product contains diphacinone, an anticoagulant in the hydrocarbon class. Vitamin K is needed. If ingested, administer Vitamin K immediately or orally, as indicated in hydrocarbon container. Report any necessary overexposure or poisoning to public health officials.

NOTE TO VETERINARIAN
If a pet or other unintended animal ingests the bait, call a veterinarian at 1-800-888-7734 or in Europe. Contains diphacinone, an anticoagulant with a half-life of the dog for unknown days. For pets that have ingested or are suspected of having ingested diphacinone, and/or have obvious poisoning symptoms, such as bleeding or slurred or abnormal times, give Vitamin K as follows: intramuscular injection. For anticoagulants with long half-lives, if known, it may be necessary to check for treatment for one’s ability to seek emergency veterinary treatment for exposed pet. See “Notes to Physician” for additional information.

DEER MICE

USE RESTRICTIONS: This product may be used to control deer mice (Peromyscus spp.) in vineyards, orchards and groves (non-bearing season only), non-crop borders, and fallow lands; along outside of fence rows and rights-of-way adjacent to canal banks, ditch banks, highways, levees, railroad lines, and utilities, and in campgrounds, recreational areas, horticultural nurseries, plantations of forest trees, pastures and rangeland.

Do Not graze livestock or plant food or feed crops in spot-treated areas while bait is present. Applications in orchards, groves, and vineyards may only be made after harvest and during the dormant period and may not be made after tree and vine growth resumes in the spring.

BROADCAST BAITING: Using a ground-based mechanical spreader or aircraft, apply bait at 2 to 6 pounds per swath acre, depending upon the density of deer mice. Make a second application 4 days after the first treatment.

HOUSE MICE

USE RESTRICTIONS: This product may be used to control house mice (Mus musculus) in vineyards, orchards and groves (non-bearing season only), non-crop borders, and fallow lands; along outside of fence rows and rights-of-way adjacent to canal banks, ditch banks, highways, levees, railroad lines, and utilities, and in campgrounds, recreational areas, horticultural nurseries, plantations of forest trees, pastures and rangelands.

Do Not graze livestock or plant food or feed crops in spot-treated areas while bait is present. Applications in orchards, groves, and vineyards may only be made after harvest and during the dormant period and may not be made after tree and vine growth resumes in the spring.

BROADCAST BAITING: Using a ground-based mechanical spreader or aircraft, apply bait at 6-10 pounds per swath acre, depending upon the density of house mice. Make a second application 4 days after the first treatment.

Revised 2/24/11
