COLLABORATORS:

Peter D. Newman, Staff Research Associate II

EXECUTIVE SUMMARY

This project was undertaken to provide the Vertebrate Pest Control Research Advisory Committee (VPCRAC) with a continuing and developing internet presence through the website www.vpcrac.org. The project built upon a series of VPCRAC funded contracts with the University of California to develop a website. Specifically, throughout this grant the researcher database component of the website was updated to include all previous VPCRAC funded grants. Up to date information on past and present projects is now available to online users through the website. Significant accomplishments were also made in adding new features and web links to the website. These include: adding past minutes and agenda for online use, vertebrate pest control handbook, adding web links for bait sales in California counties.
